

Attention: CNN News Maker

June 10.2008

I am writing this letter to draw your kind attention to the disturbing material enclosed which was brought to my attention. As the most recognized and well respected news maker machine on earth, I found it necessary to send this material for your careful consideration & scrutiny. It has no personal benefit or interest to me, but I feel it has a direct impact on the American citizens as well as yourselves. If this material contains true facts then CNN has a moral duty to the American Public and the world to expose these facts so that the injustice going on in today's world comes to a stop.

The American citizens regardless of their race or religion have always been victimized by unjust decisions and policies by American politicians. For the interest of justice I believe CNN, as a well respected news maker in United States has a moral obligation to expose and bring these facts and any other relevant facts to the American public regardless if it is positive or negative news. The American people should not be victimized economically, morally, socially again and again by political lies. The effect of keeping relevant news from the American public will only continue to lead in this downward spin which the US is already in. From a superpower and world leader the United States has become know as country run by deceitful liars who are making decisions and putting policies in place for their own benefit. This path will leave the US citizens in a state worst than some third world countries.

I feel it is my moral duty to bring this matter to CNN's attention. The US citizens are innocent and should not be excluded from the rest of the world; they are still my brothers & sisters under the lord Jesus Christ. I am a secular human being and I believe that every one of us has a moral duty to protest each other regardless of their race, religion, fate, and also their gender. That's why I am obligated to bring this to your attention, the most trusted news makers in the world (CNN). I hope it will give you the moral bush to make news.

Sincerely,

Mr. Mahmud Hussein
